Management

Adopting new technology can be difficult with competing priorities, tight budgets and high expectations from company leadership.

RMS Consulting specializes in the adoption of RMS solutions. Working with a team of implementation experts, using industry best practices we create and deliver against tailored plans, aligned to a defined business goal. We focus on maximizing business benefit and minimizing the time to value for our clients.

IMPLEMENTATION

We implement RMS solutions for insurers and reinsurers around the globe in an efficient manner through a deep understanding of clients' business, our industry expertise.

With in-depth knowledge of RMS solutions and data, we are well positioned to be an implementation partner.

Working closely with clients to deliver projects that align to their business objectives, we offer the following implementation support for RMS solutions.

System Integration

Custom Development

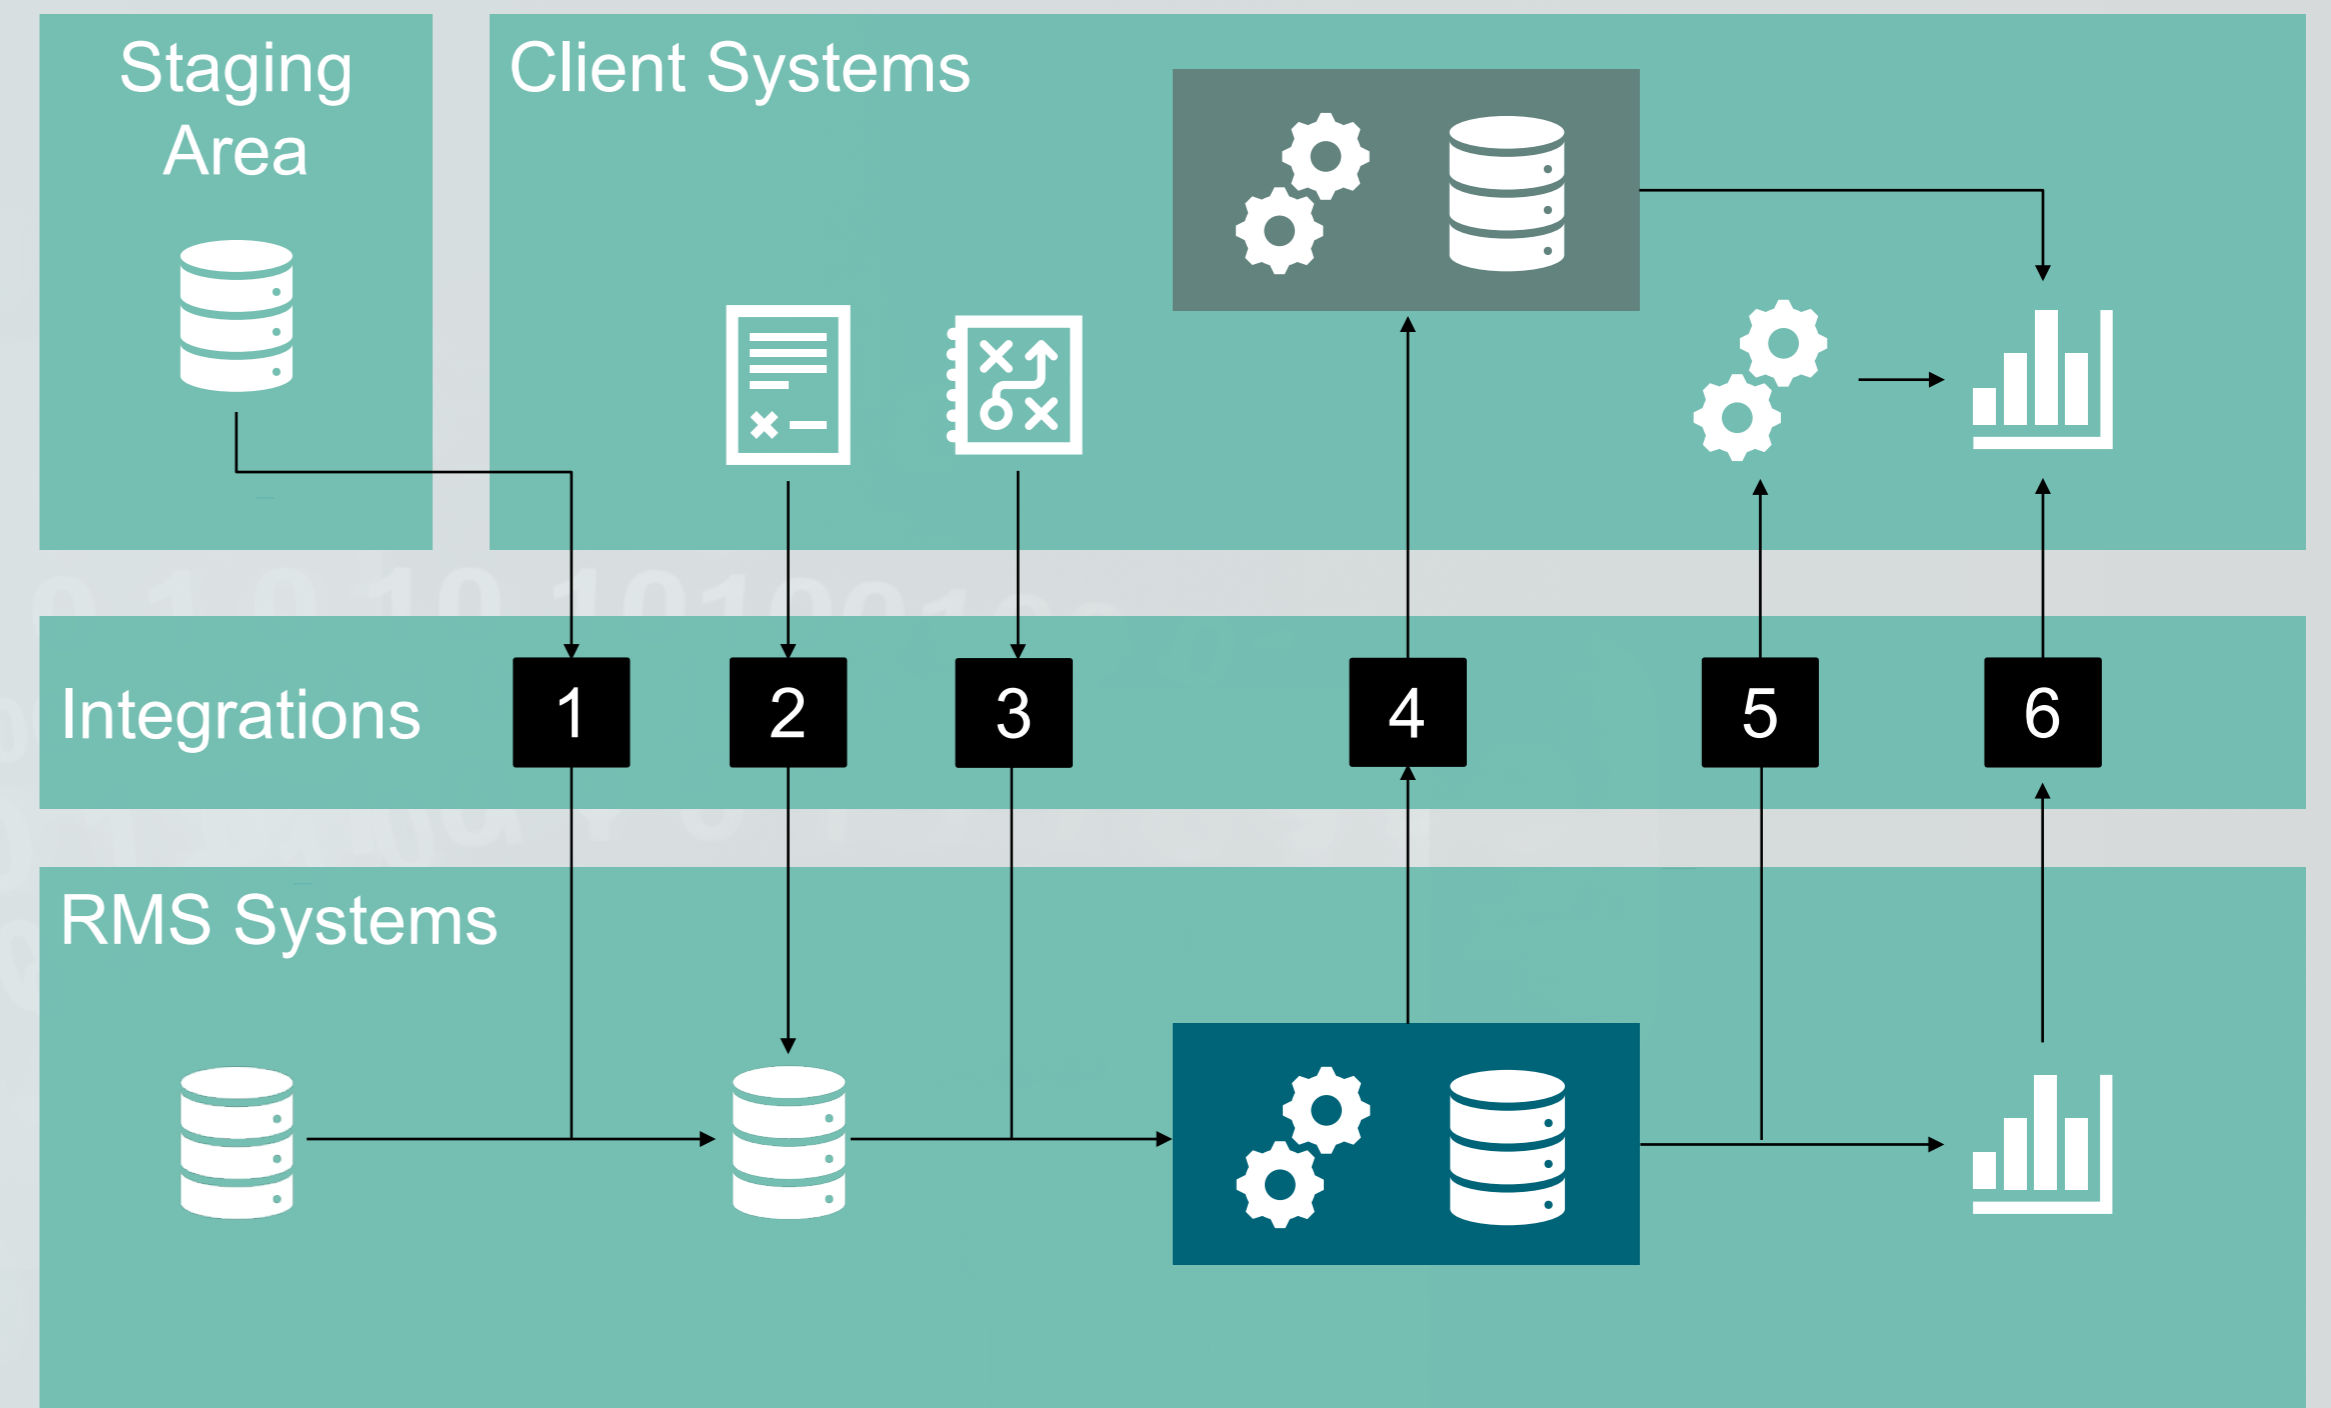

Change Management

SYSTEM INTEGRATION

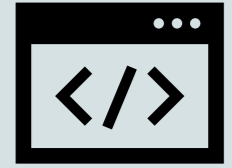

RMS Consulting will build integrations via turnkey projects or ensure a client's developers have access and training on the RMS data model, analytics and best practice integration patterns via our safeguarding service.

With dedicated and experienced project teams to guide clients through solution development, configuration, system integration and onboarding we ensure projects remain focused on business outcomes.

Benefits:

- Reduce risk of human error
- Improve team productivity
- Embed key metrics into workflows
- Reduce key person risk

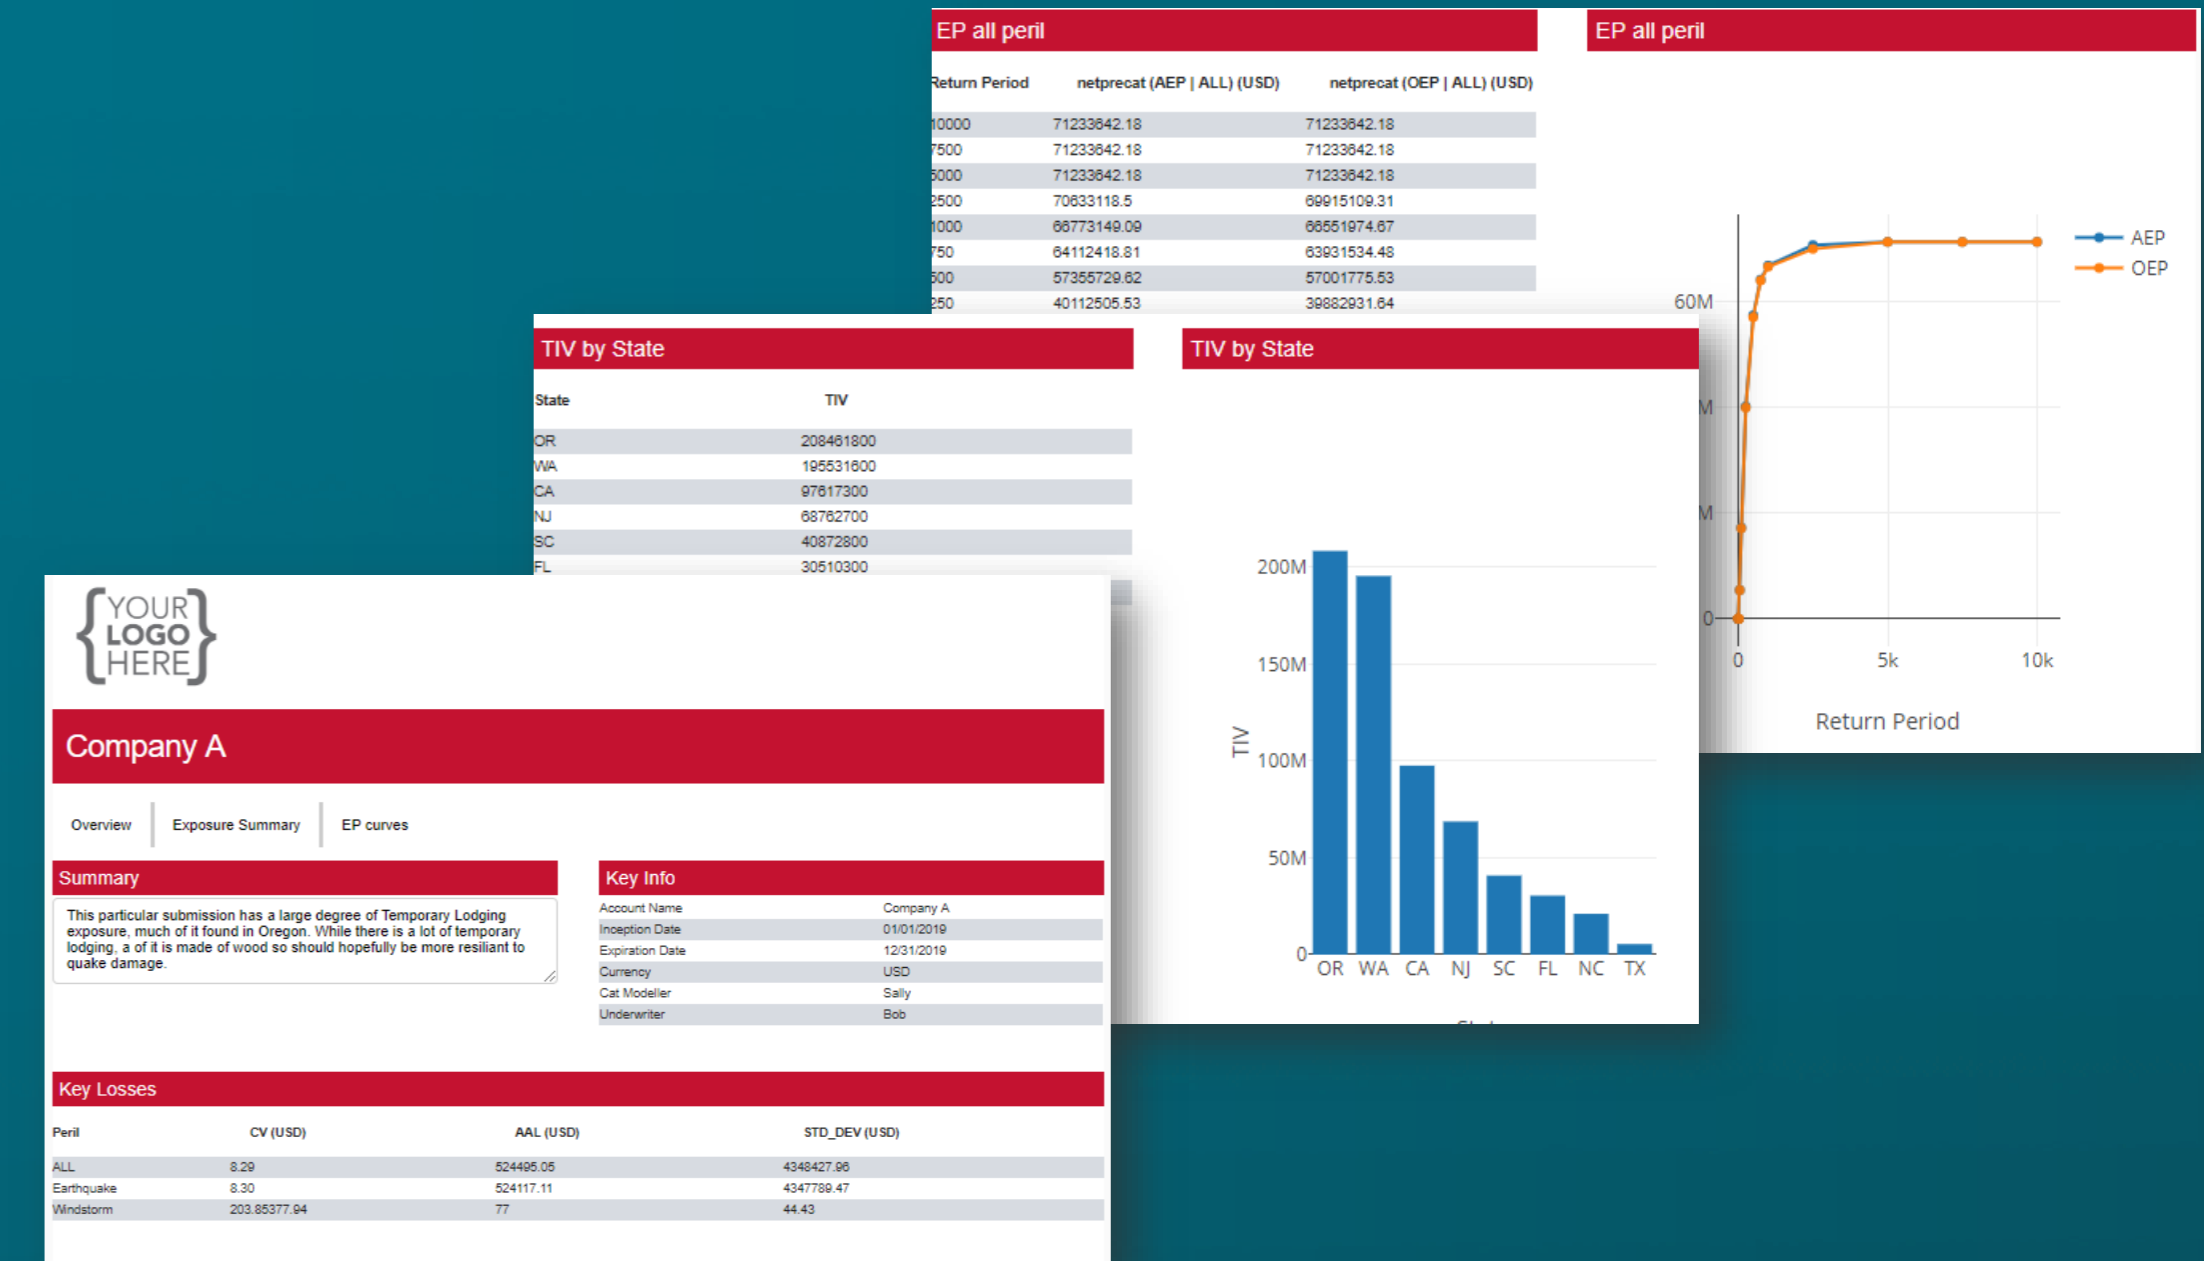

CUSTOM DEVELOPMENT

If a client wants business capabilities beyond the RMS standard solutions, RMS Consulting can help to combine RMS solutions with client's own data, tools or applications. We follow the same best practice methodology as for turnkey implementations and can help develop the following custom components:

Models: new regions, lines or model types

Applications: custom reporting, workflow automation, underwriting & roll up tools

Utilities and Tools: EP or marginal impact tools, etc.

Benefits

Gain competitive advantage through differentiation:

- Custom Underwriting analytics
- Streamline workflows
- Optimise use of capital
- Enhance management information

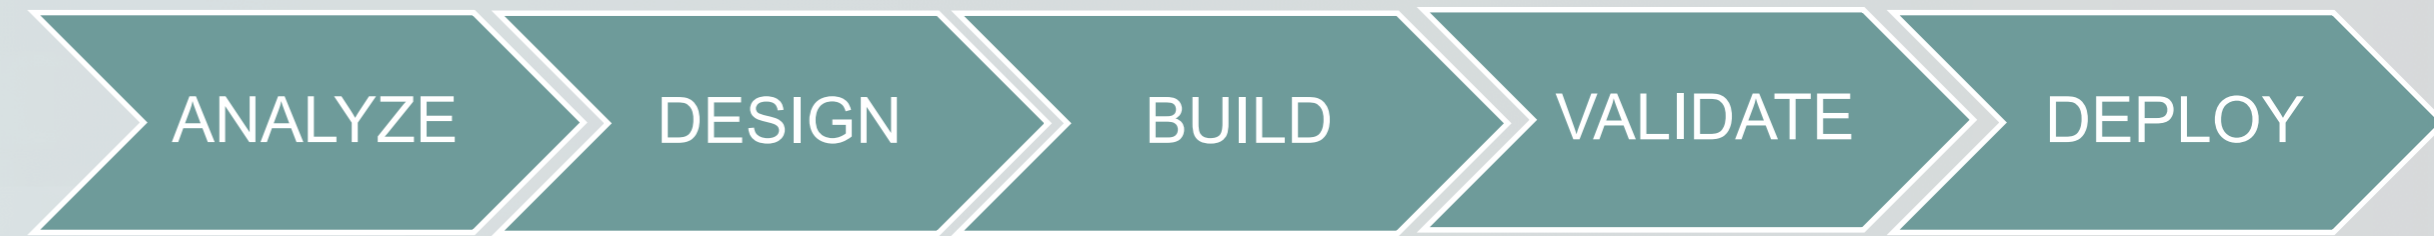

CHANGE MANAGEMENT

Jump start the journey to production and ensure successful transition.

As well as system integration, our consultants can assist with workflow redesign, data migration, model configuration, reporting and user acceptance testing.

We work closely with all project stakeholders to design solutions that meet clients' needs and maximize the benefit of adopting RMS solutions.

IMPLEMENTATION

| | | | |
|---|----------------------------|----------------------------------|------------|
| Kick-off project | Build & deploy environment | User acceptance | Smoke test |
| Elicit / synch detailed requirements | Data migration | Train your trainers and/or teams | Go live |
| Detailed design | Systems integration | Plan cutover | |
| Define test strategy & success criteria | Build custom extensions | | |
| Establish change strategy | | | |

Benefits:

- Reduce risk during transition
- Embed new system with users
- Maximize business value from new analytics
