

ANALYTICAL SERVICES CLIENT SNAPSHOT: LARGE REINSURER

- A global reinsurer dealing with multiple classes of reinsurance business, including property, casualty, marine, and energy

POSITIVE BUSINESS OUTCOMES USING CEDANT AND BRANCH-LEVEL MODELING SERVICES

Increased capacity to handle tight turnarounds for client quotes

- RMS provided “correct first time” quality output to facilitate faster turnaround, improved speed to market, and reduced need for quality checks. Aggregated and detailed schedules were prepared.
- Client was able to meet stringent deadlines for retrocession pricing.

Supported rapid global reinsurance growth with regular rollups for over ~800 cedants across 12 business units.

- RMS utilized existing automation to expedite the process and handle different formats (EXCEL, ACCESS, EDMs) and resolutions (detailed, aggregated) of data.
- On-demand, scalable capacity was created to better absorb peak spikes.

Established best practices to leverage RMS models for global business

- RMS Analytical Services understanding of the client’s data enabled application of best practices and eliminated training and onboarding impediments.
- Data quality was improved through the right process and skill set.

Large volumes of business handled with support from a flexible RMS team

Increased GWP to climb two places in Top 10 Global P&C Reinsurers listing

Confidence in global practices led to establishing a Lloyd’s syndicate to further increase footprint
